Investigación del costarricense Alejandro

Solórzano en golfo Dulce

**Serpiente venenosa atrae las miradas por su
piel amarilla**

**Se trata de especie marina que surca el mar
abierto y también las costas**

**Especie original era bicolor; científico estudia
posibles causas del cambio**

Representatividad de las áreas protegidas

Grupos	Número total de especies	Número total de especies protegidas	%	Número total de endemismos	Número total de endemismos protegidos	%
Araceae	229	205	89.5	116	97	83.6
Arecaceae	107	95	88.8	57	40	70.2
Bromeliaceae	187	156	83.3	80	64	80.0
Dynastinae	125	108	86.4	68	55	80.8
Scarabaeinae	177	165	93.2	68	64	94.1
Pisces	111	99	89.2	62	53	85.5
Total	936	828	90.0	451	373	82.7
